TO : Chief, Graphics Register

SUBJECT : Support for Photographic Reproduction on "Crash" Requirements

The Photo Intelligence Division has been involved recently in high priority projects requiring photographic reproduction support from Graphics Register on a "crash" basis. In each instance arrangements to fill the requirement were made informally, and the desired support was provided promptly and satisfactorily. This service has been much appreciated, and has facilitated the meeting of short deadlines.

The Photo Intelligence Division does not anticipate a frequently recurring need for this type of service, and will continue to levy requirements on a "crash" basis only when circumstances beyond the control of this Division make it necessary. At such times your support will be both urgently needed and appreciated.

A. C. LUNDANIL
Chief, Photo Intelligence Division
